Englishtown, NJ 07726

Phone: 732.792.1234

Fax:: 732.792.8305

Email: rma@quadrangleproducts.com

FIRST ARTICLE APPROVAL

- The First Article Approval is only required for customers that request a pre-production run qualification of design and material.
- Customers that do not require qualification are in agreement with Quadrangle Products Inc. that the purchased product is to be made based on the Quadrangle Products Inc. design file. By doing so, also, approve all specifications that are applicable to the design and are in agreement that material may be substituted as long as it is equivalent to the originally designated material based on the discretion of Quadrangle Products Inc.
- A hard or soft copy of the design file with the specifications to which the product is manufactured can be sent with the First Article Approval Form upon request.
- First article material is to be approved and signed off by a corresponding representative of the purchasing company (i.e. President, Vice President, or Department Manager) and a Senior Engineer or Technical Advisor.
- Once a design file is qualified it can not be changed. If a customer requires changes to be made, an updated drawing or official change request must be submitted by the customer. A new Part Number may be created depending on the changes that are requested, and it is recommended that the customer requests another First Article Approval.
- If a design file is not approved, the Senior Engineer or Technical Advisor must verify the reason(s) for rejection, and contact the Quadrangle Products Engineering Staff. Quadrangle Products Inc. Engineering Staff will re-evaluate the design file based on reasons for rejection and customers suggested solutions. If it is determined to be a plausible solution, Quadrangle Products Inc. will make incorporated the customers requested solution. Otherwise, an alternate solution will be suggested by the Quadrangle Products Inc. Engineering Staff.
- Quadrangle Products Inc. reserves the right to re-quote any cable assemblies at any time.
